

**ADVANCED GUITARISTS:** By applying the information available in the Movable Chord and Scale Table to the Movable Chord and Scale Forms it is theoretically possible to find and play any chord or scale, in any key, anywhere on the fretboard. For example, A7  $\flat 9$  (1, 3, 5,  $\flat 7$ ,  $\flat 9$ ) could be found on the guitar by taking A7 (1, 3, 5, 7) and adding the  $\flat 9$  or by taking A9 (1, 3, 5,  $\flat 7$ , 9) and dropping the 9 to  $\flat 9$ . The  $\flat 9$  is often omitted in guitar chord voicings.)

Any chord, when replaced with another chord from the same chord family, retains its basic sound (major, minor, etc.) but takes on the tone color of the new chord. For example, Gm could be played as Gm7, Gm9, etc.). Scales used as a basis for melodic playing over the chord will almost always contain the chord tones to provide points of resolution for the melodic line. By changing tone colors, you can be given the sound of a specific style.

**GUITARISTS** are ready to expand their knowledge of music and using movable chord forms (bar chords). Learning to play in each of the Five Basic Movable Forms provides a framework for playing chords in five interlocking movable positions which cover

the fretboard for major chords and the major scale in each of the five positions. Learning to find and play other chords or scales in each position provides a framework for playing notes to the major form. Playing songs which use a variety of the chords in various areas of the neck, and exploring the fretboard used to play over each chord will give the guitarist a working fretboard.

**FEATURES** An essential reference for knowledge of music and guitar, this book covers the entire guitar (and chords). Learning to play guitar is made easy. This book provides a framework for understanding the guitar, including positions which cover

...the guitar... scales in each of the five... scales in each position... which use a variety of... and exploring the... the guitarist a working

## WISCONSIN DELLS, J-6 —

Nearby is Storybook Gardens, a fantasy land where such children's favorites as Little Bo-Peep and The Three Little Pigs come to life, and where the whole family can lunch or dine in the Gingerbread House.

## RICHARD BONG MEMORIAL, B-3—

In the little Northwoods town of Poplar stands a P-38 fighter plane, as a memorial to Richard L. Bong, who came from Poplar to become this nation's all-time war ace. Maj. Bong shot down 40 enemy planes in the South Pacific during World War II. He was killed while testing a jet in 1945.

**WISCONSIN DELLS, J-6**—Indian legend say the Dells were formed by a giant serpent moving south, battering its way through great masses of solid sandstone and "leaving the land rent and broken." The Upper and Lower Dells are separated by the town of Wisconsin Dells, which has accommodations for as many as 10,000 visitors from May through October.
